- **Secondary School Certificate, from Maharashtra Board**
Mahatma Gandhi Vidyalyaya, Manchar
2015 - 2016

About Me

Full Stack Engineer with extensive experience in Node.js, Express, HTML, CSS, JavaScript, and Java. Proficient in designing and implementing data structures, ensuring efficient and scalable code. Additionally, skilled in iOS mobile application development, delivering high-quality, user-centric apps. Adept at end-to-end project management and committed to continuous learning and innovation.

Work Experience

Atos Syntel Oct 2022 - Nov 2023

Key responsibilities:

Successfully completed a comprehensive training program covering the following key areas:

- Swift Programming Language: Developed a strong foundation in Swift to create efficient and reliable code.
- iOS Application Development: Acquired in-depth knowledge of iOS app development techniques, best practices, and platform-specific tools.
- AutoLayout Mastery: Gained expertise in AutoLayout, enabling the creation of responsive and visually appealing app layouts.
- Core Data Implementation: Acquired proficiency in utilizing Core Data for efficient data storage and management within iOS applications.
- Unit Testing in Swift: Mastered the art of unit testing in Swift to ensure the robustness and quality of code.

Personal Projects

Superhero Hunter

- Role: Java Full Stack Developer
- Description: Developed a Superhero hunter app using simple html, css and javascript. On the home page there is a list of all superheroes fetched from an API provided by Marvel. By clicking on any superhero card one can see details of a superhero also a superhero can be added to favourites. List of favourite superheroes can be seen on favourites page. One can search for superhero where by search results get updated on every letter entered in search field.

Splitwise App Clone

- Role: Mobile Application Developer (Native iOS)
- Description: Developed a Splitwise app clone using Swift and native iOS, enabling users to manage group expenses. Implemented MVVM architecture, dynamic UI with auto layout for seamless compatibility across iOS devices. Conducted app-related CRUD operations using CoreData.

Weather App

- Role: Mobile Application Developer (Native iOS)
- Description: Created a weather app in Swift, fetching data from an API. Utilized MVVM architecture, dynamic UI with auto layout for universal iOS compatibility. Implemented data fetching using URL sessions, storing it in a model, and displaying it on relevant screens.

Certifications

- Java Full Stack Developer Course, EduBridge, 28 February - 28 July, 2022 
- Microsoft Certified - Azure Fundamentals 
- Java for beginners by Programming Knowledge, Cursa 
- Java Course, Sololearn
